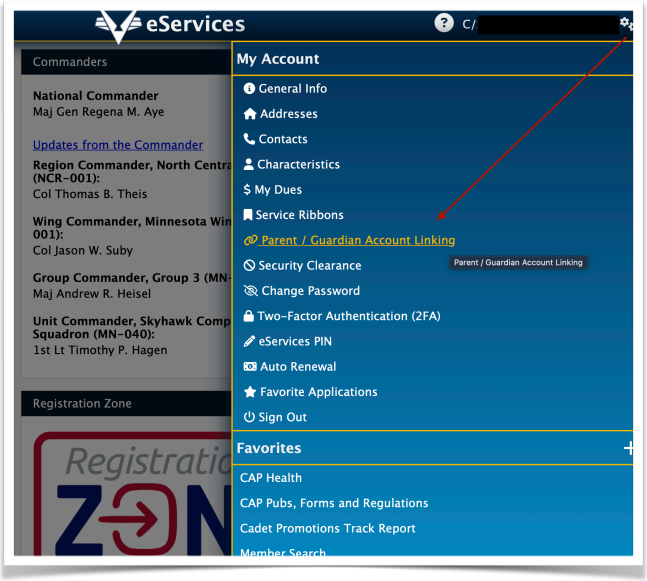
How to Link a Parent/Guardian Account in eServices

WHY? New policy from National Headquarters allows (and for some CAP activities, requires) cadets to link their eServices accounts to a Parent/Guardian account. This allows a Parent/Guardian to approve activities through Registration Zone and once linked, will greatly streamline that process. (Once information is entered in a cadet's account for Registration Zone… it's just a matter of checking boxes for future activities vs re-entering the information each time.) *For security reasons, expect to verify your email/account more than once.*

STEP ONE: have your cadet log into their eServices account. Once there, click on settings (top right corner) > Parent / Guardian Account Linking



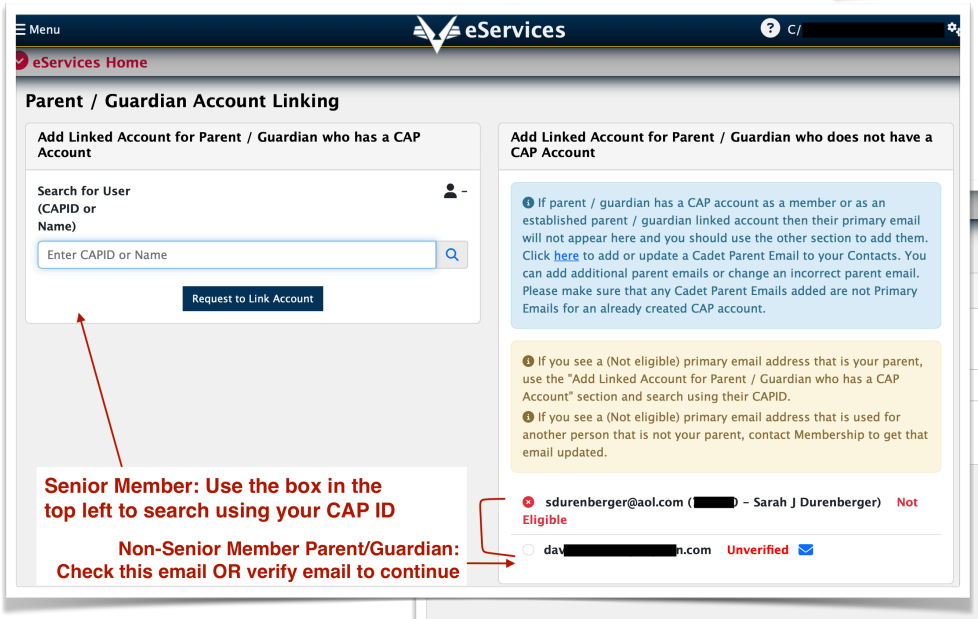
STEP TWO: determine what email address you will link to cadet's account; you can link more than one.

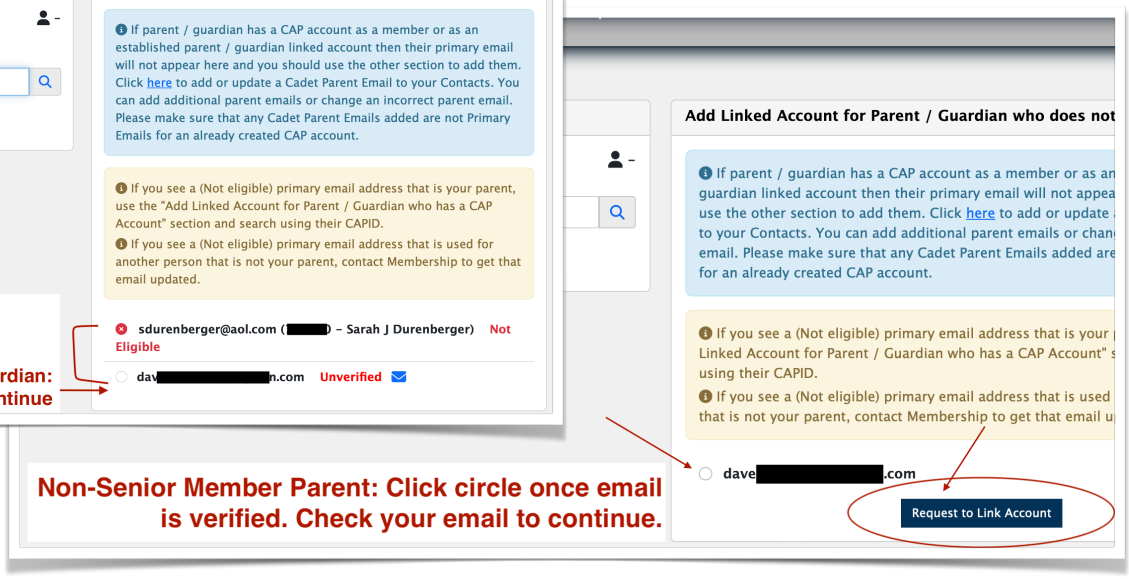
Senior Members can use their account but must search using their CAP ID (on left), then click "Request to Link Account" button.

Non-Senior Members should see their email address(es) listed on the right. They may need to be verified first. Simply click on the blue mail icon to initiate the email verification.

STEP THREE: go to email(s) to verify the account(s).

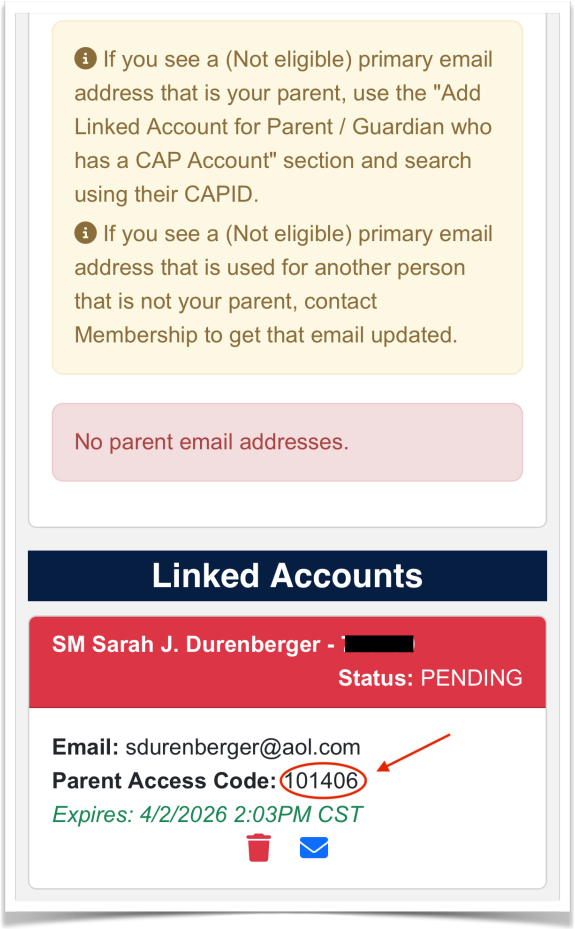
Once your email has been verified, you'll be able to check the circle and "Request to Link Account"



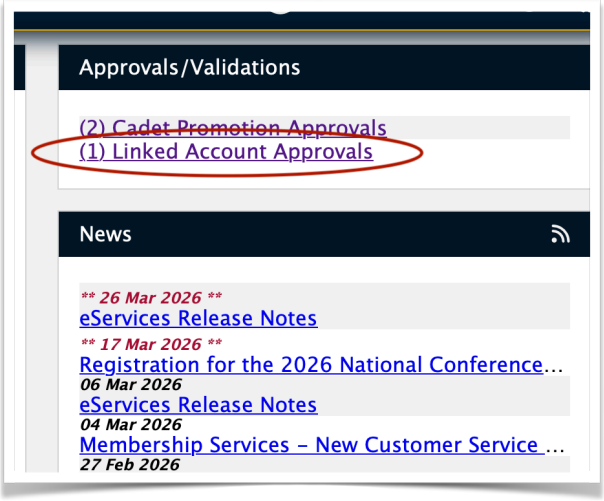


STEP FOUR: after the email(s) have been verified, go to the cadet's eServices account > Settings > "Parent / Guardian Account Linking" tab. Under the Linked Accounts section, write down the "Parent Access Code" to complete the process.

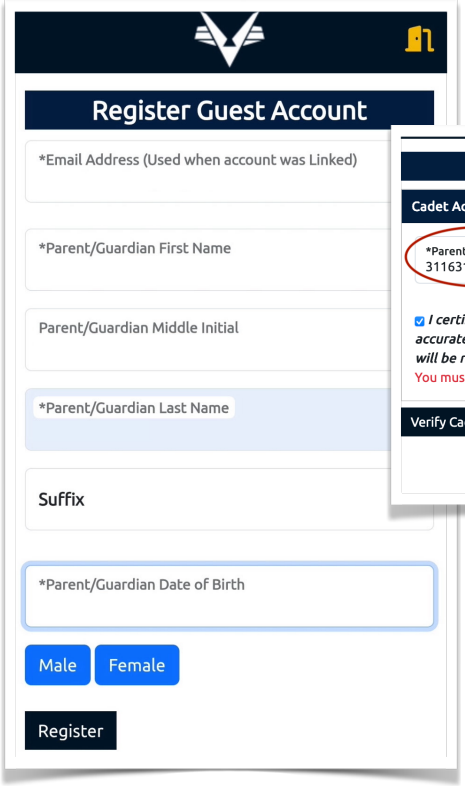
Both Senior Members and Non-Senior Members, will need this code to complete the set up. If the request to Link Account is made a second time, the code will update. The most current code must be used. If you have more than one cadet, each will have their own unique code.



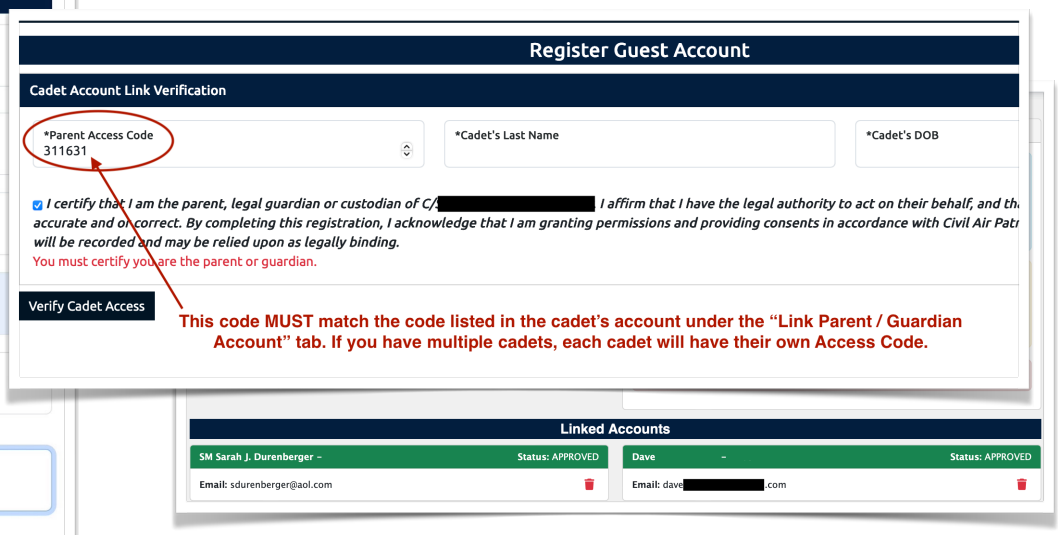
STEP FIVE Senior Members: you should see an email with the subject: **Civil Air Patrol - Linked Account Requested** - that will have a link to approve or deny the request. Log into YOUR eServices account to approve the linked account. Use the Access Code from your cadet's account to finalize.



STEP FIVE Non-Senior Members: you should see an email from CAP with the subject: **Civil Air Patrol - Linked Account Requested**. That email will allow you to create a provisional account to be linked.



Follow the prompts to register your guest account. This will provide you with a guest CAP ID. Be sure to write it and the password down to log-in in the future. Use the Access Code from your cadet's account to finalize.



Once approved, the linked accounts will appear in your cadet's account.
